

How Durotex belts can lower operational expenses.

Reduce overall costs.

As you can see from the test results below, *Durotex* belts combine a variety of product advantages. The combination adds up to a total cost/value benefit that sets the standard of comparison for the industry.

Belts are less than 5% of your overall operating costs. The bulk is in utilities, labor, chemicals, maintenance, and downtime. But *Durotex* belts and the *Durotex* 4-Step Program not only lowers your belt costs, but total overall costs as well.

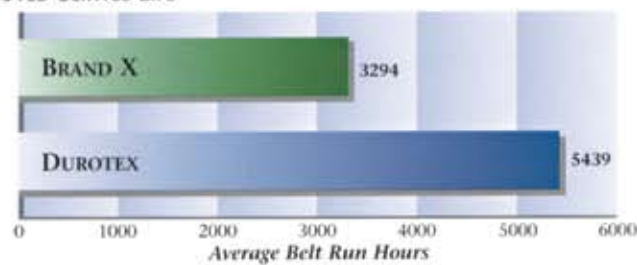

OPERATIONAL COST STRUCTURE

Maximum belt durability.

Durotex belts are wear resistant and feature the strongest seams available in the industry. Our longer-lasting belts offer a lower per hour cost and reduce belt replacement labor costs.

Higher capture rate.

By facilitating improved liquid/solid separation, efficiency is increased and the overall process cost reduced.

IMPACT OF CAPTURE RATE ON PRODUCTION EFFICIENCY

Improved cake dryness.

Higher cake solids lower your cost for polymer, drying, incineration, energy, transportation and disposal. A 1% increase in cake dryness can save hundreds of thousands of dollars in incineration and drying costs alone.

IMPACT OF CAKE DRYNESS ON DISPOSAL COSTS

Better cake release.

Belts stay cleaner, maximizing gravity, pressure, and vacuum zone drainage. You get better performance with lower labor costs.

Weaving excellence into a world of products

IFC – specialists in industrial textiles for more than 40 years.

With research and production facilities on two continents, we literally span the globe to provide fabrics that meet your needs—from optimum production conditions to assuring the highest standard of manufacturing excellence.
